

NNVLP Functions

MISSION

The mission of the Navajo Nation Veterinary & Livestock Program is to provide comprehensive veterinary services for the protection of animal health, to alleviate animal suffering, to conserve livestock resources, to promote public health and the advancement of medical knowledge.

VISION

Our vision of the future is to obtain a balance within the People, Nature and the Animal kingdoms with the Navajo Nation, where disease, animal overpopulation, neglect and livestock resource problems are no longer a threat to the health and safety of the Navajo People.

Did You Know?

Each day 10,000 humans are born in the U.S. – each day 70,000 puppies and kittens are born. As long as these birth rates exist, there will never be enough homes for all the animals. As a result, millions of healthy, loving dogs, cats, kittens, and puppies face early deaths as a form of animal control. Other are left to fend for themselves against automobiles, the elements, animals, and cruel humans. What can you do to stop the suffering? ***Spay and neuter your pets!***

An unsprayed female dog, her mate and all of their puppies and their puppies' puppies, if none are ever neutered or spayed, add up to:

1 year = 16

2 years = 128

3 years = 512

4 years = 2,048

5 years = 12,288

6 years = 67,000 dogs

Concept from: Spay USA, www.spayusa.org

“Are your pets spayed and neutered?? Stop pet overpopulation!!! Do your part.”
